

SHANTANU DEY

Software Engineer | Java | Spring Boot | REST APIs | Python | Azure Cloud | NoSQL | Maven | Git | Backend Development | API Testing

+91-6291972037 @ deyshantanu101@gmail.com www.linkedin.com/in/shantanu-dey-7724571b2/ Kolkata, India

SUMMARY

Software Engineer with experience in backend development, REST API design, and cloud-based applications. Skilled in Java, Spring Boot, Python, and NoSQL databases with hands-on experience building and testing APIs using Postman. Familiar with Azure cloud services, Maven build management, and Git version control within Agile development environments. Experienced in developing backend modules, integrating cloud services, and supporting application configuration and debugging. Strong foundation in data structures, system design, and secure coding practices, with knowledge of cybersecurity tools and practices. Seeking Software Engineer roles to contribute to building secure, scalable, and reliable software solutions.

EXPERIENCE

Software Engineer

- Persistent Systems Ltd. 12/2021 - 12/2022 Hinjewadi, Pune
- Developed and tested **backend APIs** using **Spring Boot** and performed API validation using **Postman**.
 - Assisted in **NoSQL database configuration** and backend setup while managing builds using **Maven**.
 - Contributed to **application development in Agile teams**, maintaining code through **Git version control**.
 - Supported **debugging and testing activities** to improve backend functionality and system performance.

PROJECTS

Serverless Web Application for Payment Gateway

- Built **backend modules for a serverless payment gateway**, enabling secure transaction processing and reliable application functionality.
- Integrated application services with **Microsoft Azure cloud infrastructure** to support scalable backend operations and service connectivity.
- Designed and developed **RESTful APIs** to manage payment workflows and enable communication between system components.
- Managed **project builds and dependencies using Maven**, ensuring smooth compilation, version control, and application deployment processes.
- Implemented **secure data communication** between backend services to maintain transaction integrity and system reliability.

Financial Application

- Built **RESTful APIs** to manage financial transactions and enable secure data exchange between application modules.
- Performed **API testing and validation using Postman** to ensure endpoint functionality and response accuracy.
- Configured a **NoSQL database** to store, retrieve, and manage transaction data efficiently.
- Assisted in **backend configuration and application environment setup** to support smooth system deployment and operation.

Object Detection Using HAAR Cascade

- Built an **image recognition solution** using **HAAR Cascade classifiers** to detect and classify objects from image inputs.
- Applied the **AdaBoost algorithm** to improve the accuracy and efficiency of the object detection process.
- Utilised **Python and OpenCV** libraries to perform image processing and feature extraction tasks.
- Developed detection models capable of identifying objects in both **images and real-time video streams**.

EDUCATION

M.Tech - Information Security / Cyber Security
Maulana Abul Kalam Azad University of Technology, Kolkata, India

2024 - 2026

B.Tech - Information Technology
Techno India Group (BIT), Maulana Abul Kalam Azad University of Technology, Kolkata, India

2016 - 2020

CERTIFICATIONS

Microsoft Certified - Azure Fundamentals (AZ-900) | Microsoft | May 2022

TRAINING

Basic Cyber Security Practices
CDAC - Kolkata | May 2021

SKILLS

Programming Languages

Core Java, Python, JavaScript, SQL, HTML, CSS, Bash/Shell Scripting, Golang

Frameworks & Libraries

Spring Boot, Hibernate, Node.js, React.js, Angular, RESTful APIs, Bootstrap, jQuery

Software Development & Architecture

Object-Oriented Programming (OOP), Data Structures & Algorithms, Microservices Architecture, Design Patterns, Multithreading & Concurrency, API Development, System Design, MVC Architecture, Event-Driven Architecture, Secure Coding Practices, Code Optimization, Scalable Application Development

Databases & Data Management

MySQL, PostgreSQL, MongoDB, Oracle Database, Database Design, Query Optimization, Stored Procedures, Database Indexing, NoSQL Databases, Data Modelling

DevOps, Tools & Platforms

Git, GitHub, GitLab, Docker, Kubernetes, Jenkins, CI/CD Pipelines, Maven, Linux, Azure

Testing, Debugging & Development Practices

Unit Testing, Integration Testing, JUnit, TestNG, Debugging, Agile Methodology, Scrum, Test Automation, Code Review, Continuous Integration, Performance Testing

Cyber Security Tools and Framework

John the Ripper, Wireshark, Tcpdump, Nmap, Metasploit Framework, ACUNETIFYX, Nessus

AI Tools & Platforms

Claude, GitHub Copilot, Hostinger Horizons, Replit, Lovable, DeepSeek, OpenAI (ChatGPT & APIs), Gemini Pro
